PROFESSIONAL SUMMARY

Full-stack software engineer with 4+ years of experience as a student software engineer at Intel, building and owning internal tools deployed across multiple global sites. Proficient in Angular, TypeScript, C#/.NET, and REST APIs. Experienced with enterprise-scale CI/CD pipelines, Azure DevOps, and hardware-integrated software systems. Passionate about clean, maintainable systems and cross-functional delivery.

WORK EXPERIENCE

Software Engineer – Full Stack (Student Position) *2021 – 2026*

Intel | Equipment Team

- VTH (Validation Test Handler): Maintained and enhanced an internal robotic handler used by Intel validation labs for CPU testing across multiple global sites.
- Implemented new features and workflows, resolved production issues, and managed software releases for VTH across multiple sites.
- Developed a centralized equipment reporting solution, enabling multiple projects to report utilization data via a shared REST API.
- Supported various equipment tools including robotics and related services, contributing to feature development, bug fixes, and integration efforts.
- Designed and executed pre-release quality test plans to validate new functionality and ensure system stability in hardware-integrated environments.
- Developed full-stack solutions using Angular, TypeScript, C#, and .NET, with a strong focus on maintainability and reliability.

Group Manager *2019 – 2021*

Runners Without Borders

- Coordinated and managed group activities, volunteer recruitment, and community events.
- Maintained and enhanced the organization's website, increasing user engagement.

Psychometry Tutor *2017 – 2019*

Infinity

- Tutored students in quantitative reasoning and problem-solving in preparation for the psychometric exam.

SKILLS

Programming Languages: Java, C#, Python, TypeScript, JavaScript

Frameworks & Technologies: Angular, .NET, REST APIs, MongoDB, SQL, CI/CD Pipelines, Azure DevOps, Git

Engineering Concepts: Full-Stack Development, Software Validation, Object-Oriented Design (SOLID)

Languages: English (Fluent), Hebrew (Fluent), Arabic (Native)

EDUCATION

B.Sc. in Computer Science *2020 – 2025*

University of Haifa

Relevant Courses: Operating Systems, Software Engineering, Algorithms, Algorithms for Planar Graphs, Image Processing

VOLUNTARY PUBLIC WORK

Web Track Mentor *2018*

She Codes

- Mentored beginner students in foundational web technologies including HTML, CSS, and JavaScript.
